Reasons for Allowance

1. In response to amendment filed on 18 February 2005. Claims 1-4, 6-13, 15, 16, and 18 have been amended. Claims 20-25 are new. Amendment to the claims is accepted. Amendment to drawings and specification is accepted; however note the drawings contain informalities documented on Draftsman Review Form, PTO-948.

Allowable Subject Matter

2. The following is an examiner's statement of reasons for allowance: Claims 1-4, 6-13, and 15-25 are allowed due to amendment and arguments beginning on page 13, that the references do not teach "Applicants' process of applying two independent, different-level encoding steps (i.e. optical, deflection encoding at one level and mathematical encryption at a higher level) to two different images (viz to a source image and a deflected image or, alternatively, to two sources images), to completely transform those images (not simply hide them within a visible image), and thereby produce two independently, different-level decodable images as a unitary security feature, either or both of which can be selected for decoding by a user without interference with the other (the optical level security feature being decodable by optical decoding and the mathematical level security feature being decodable by decryption)". The encoding and decryption described are indicated in steps a, b, and c of the independent claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance".
